Materials Letters

An interdisciplinary journal devoted to rapid communications on the science, applications, and processing of materials.

Welcome to the online submission and editorial system for *Materials Letters*.

Materials Letters is dedicated to publishing novel, cutting edge reports of broad interest to the materials community. The journal provides a forum for materials scientists and engineers, physicists, and chemists to rapidly communicate on the most important topics in the field in materials. We are primarily interested in those contributions which bring new insights, and papers will be selected on the basis of the importance of the new knowledge they provide.

Contributions include a variety of topics such as:

- **Materials** - Metals and alloys, amorphous solids, ceramics, composites, nanocrystals, polymers, semiconductors.
- **Applications** - Structural, opto-electronic, magnetic, medical, MEMS, sensors, smart, biomaterials.
- **Characterization** - Analytical, microscopy, scanning probes, nanoscopic, optical, electrical, acoustic, spectroscopic, diffraction.
- **Novel Materials** - Micro and nanostructures (nanowires, nanotubes, nanoparticles), nanocomposites, thin films, superlattices, quantum dots.
- **Processing** - Thin film processing, sol-gel processing, mechanical processing, assembly, and nanocrystalline processing leading to unique materials.
- **Properties** - Mechanical, magnetic, optical, electrical, ferroelectric, thermal, interfacial, transport, thermodynamic.
- **Synthesis** - Quenching, solid state, solidification, solution synthesis, vapor deposition, and high pressure, explosive processes leading to unique materials. forming, rapid quenching, extrusion and milling.

NEW! This journal offers a free service called AudioSlides. These are brief, webcast-style presentations that are shown next to published articles on ScienceDirect and can be viewed for free. This format gives you the opportunity to explain your research in your own words and promote your work by embedding it on your own website and sharing in social media. For more information and examples, please visit <http://www.elsevier.com/audioslides> or watch our [webinar](#).

Step-3

Select – Article type

VSI- Materials for Energy Technologies

New Submission

[Frequently Asked Questions](#)

Select Article Type

Enter Title

Please Select an Article Type

Selecting an Article Type is Required for Submission.

To submit your manuscript to this journal, you need to complete all submission steps and approve the PDF that the system creates. Please note that submissions that have not been completed will be removed after 90 days. [More] The Guide for Authors lists the journal's requirements. To read the Guide for Authors, click the link in the banner at the top of each page.

You may also view the Tutorial for Authors for help with each submission step.

Article Types: If you are submitting your paper for regular issue then please select 'Short Communication', for Materials for Energy Technologies special issue please select 'VSI: Materials for Energy Technologies'.

Please note: Manuscripts must not exceed 2000 words plus three figures and one table. This includes the title, authors, affiliations, abstract, keywords, body of the manuscript, acknowledgements and references. The maximum number of figures is strictly limited to five. If the maximum of 5 figures is used, then the total number of words must be reduced to 1600; if 4 figures are included, then the total number of words must be reduced to 1800. If more than 5 figures are used, the manuscript will be rejected. The manuscript submitted for review should not exceed 8 pages (including title, abstract, references, figures, tables and figure captions).
